

004 Series Plug Valve

Design Considerations

The 004 Series Plug Valve incorporates a one piece Brass Body and O-Ring Face Seal Plug design to cover one-way high pressure or vacuum applications. The plug is sealed on the top and bottom by radial O-Rings. A Bleed Path on the downstream side vents pressure out of the plug cavity when the valve is in the full closed position.

Specifications:

Maximum Operating Pressure — 3000 psi **Maximum Operating Temperature** — 180°F **Plug Through Diameter** — .188

Material Options	Brass Body, Plug and Handle, Stainless Stop Pin and Retainer
Seal Options	Fluoroelastomer (Viton®) Standard Buna-N, Ethylene Propylene, Neoprene
Inlet End	1/4 Female NPT
Outlet End	1/4 Female NPT

Example of how to order:

Inlet End	Bypass End	Seal
1/4 FNPT	1/4 FNPT	Buna-N

Part Number: BRS 004 PV-4F4F-F

Part Numbers are a description of the Inlet, Outlet and Seal Material as read from left to right.

Example: BRS 004 PV-4F4F-F = 1/4 Female x 1/4 Female NPT, Viton Seals
